

NASDAQ CONTRIBUTOR API

Take your business further with access to over 700 worldwide distribution networks

With the Nasdaq Contributor API your index idea is now a reality. With our premium index/ETF dissemination service, firms like yours are now able to distribute your data to some of the broadest outlets available.

UNPARALLELED DISTRIBUTION NETWORK /

Clients that seek broader distribution of their index/ETF information can leverage one of Nasdaq's distribution vehicles that are robust, scalable, and monitored by Nasdaq's technology and support team. Nasdaq Data API is an efficient and cost effective way to help get your data in front of more than 700 firms globally including:

- Television media
- Financial web portals
- All major market data vendors
- Sell-side banks
- Buy-side firms
- Retail online brokers

FLEXIBLE CHOICES /

- Low volume interface or a higher volume solution
- Low bandwidth model (web-based) or high bandwidth model App to App Extranet Provision
- Code to a Nasdaq-branded API via a standard format
- Choose among multiple proven dissemination channels (Global Index Data Service (GIDS), Global Index Watch (GIW) or Global Index FlexFile Delivery (GIFFD))
- Input detailed index or ETF values and/or constituent-level data for turnkey downstream consumption

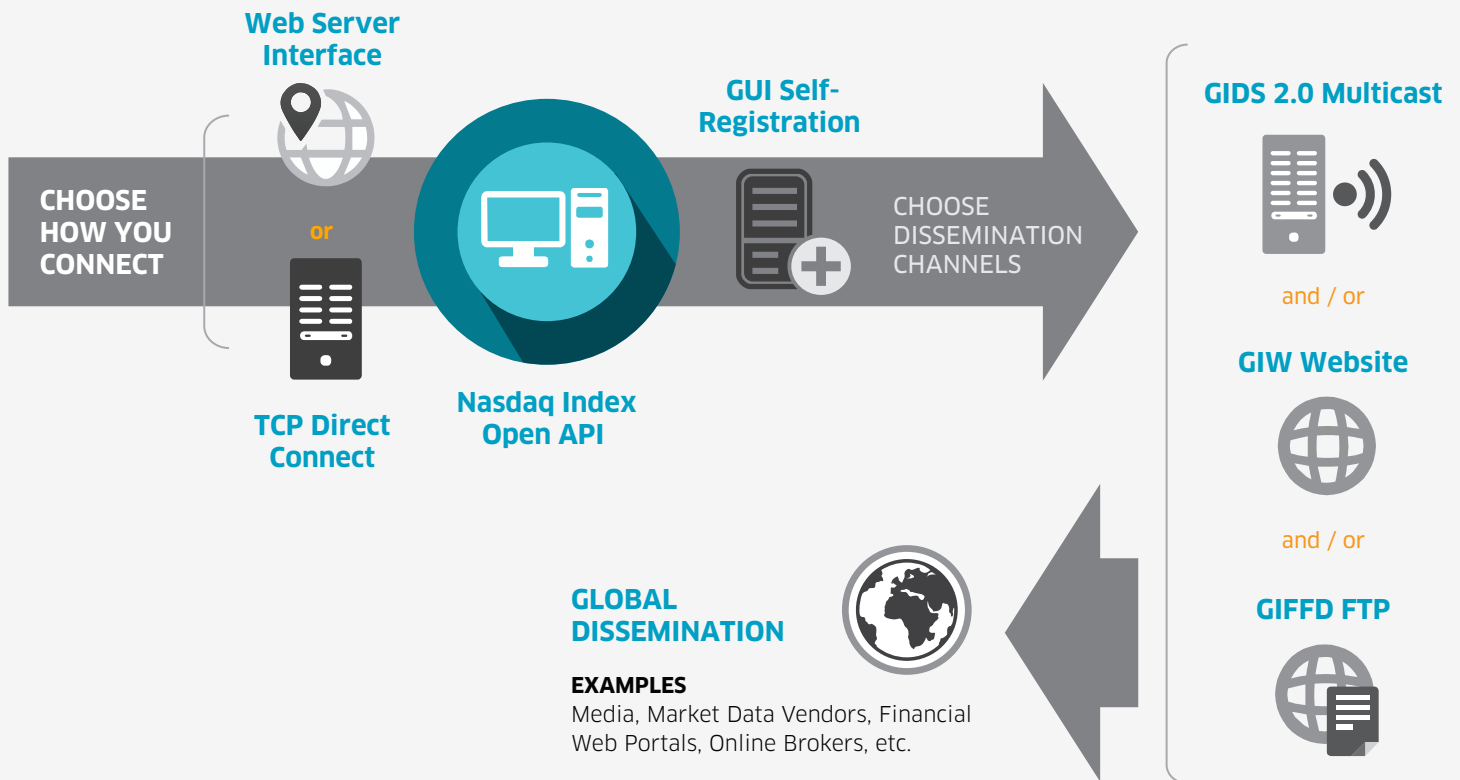

INDEX DATA /

- Intraday Index Level (Price Total Return, Gross Return and Net Return)
- Settlement Values
- Currency Spot values for select instruments
- Daily security components data
- Start-of-Day and End-of-Day summary data by asset class

ETF DATA /

- Intraday Portfolio Values (IPVs)
- Daily valuation information, such as NAV per Share, Estimated Cash per Share, Estimated Cash per Creation Unit, Total Cash per Creation Unit and Total Shares Outstanding of the fund
- ETF Directory message designed to provide the symbols of the ETF valuations

INDEX DISSEMINATION /

TAKE YOUR BUSINESS FURTHER /
