1 Nasdaq ISE, Nasdaq GEMX and Nasdaq MRX Rules 706 allow market participants to enter into sponsored access relationships. Sponsored Access is defined in these rules as an arrangement whereby a member permits its customers to enter orders into the exchange's trading system that bypass the member's trading system and are routed directly to the exchange, including routing through a service bureau or other third party technology provider. If you have a sponsored access arrangement, you are required to disclose that relationship by sending an email to [membership@nasdaq.com](mailto:membership@nasdaq.com). Please indicate the party that is being sponsored by your firm and on which market. This information is utilized for both regulatory and operational information in granting access.
